ABOUT US

Aqua Spa and Leisure are an independent hot tub & swim spa distributor, we pride ourselves in taking a very personable approach to our work, offering a unique service that you may not find with more corporate companies. When it comes to the product that we offer, high quality is everything to us. We strive to lead the way bringing new technologies, spa designs and features to our customers. We offer our customers a wide selection of hot tubs and swim spas and believe we have something to suit every need.

We started as a small business and will always hold onto that mindset of every customer being just as important as the last. Our dedicated core team of people with their combined years of experience all hold the same core values, believing passionately in delivering exceptional customer service and after-sales care. Using our extensive knowledge, we guide you through the many hot tub options available to you, ensuring you have the perfect spa to fit your needs..

WHY BUY FROM US?

Hot tubs are the ultimate indulgence, giving you the opportunity to relax and unwind in your own space. Using a spa will not only help to put you at ease and bring your family together, but it also offers a number of health benefits, such as pain relief, stress reduction, and circulation improvement. Our collection contains the best UK hot tubs for you to choose from, with 2 person spas, 3 and 4 person hot tubs, all the way up to 6 person hot tubs. Hire a hot tub, pay a deposit, pay on finance or buy outright. Shop the range of hot tubs for sale now.

Q&A WITH LAWRENCE HOOKWAY - SALES AND MARKETING DIRECTOR...

Q1: How much does a hot tub cost to run?

The daily running costs of hot tubs can vary wildly depending on the quality of the components, the insulation and the surrounding climate. Our spas are all manufactured by Master Spas in the USA. They use the latest energy efficient components and a unique full foam insulation that maintains its thermo-insulation properties for the lifetime of the spa and not just for the first couple of years. We do have estimated manufacturers standby running costs for all of our spas. Under test conditions, The Getaway 4, comes in at 86p per day to run. Of course, this could increase if the lid was left off all day or if the spa was in use for hours on end or perhaps if the weather was particularly chilly.

...CONTINUED

Q2: Are there any other ways to keep costs down?

Yes there are a few options to consider when keeping running costs down, you can think carefully about the location of the hot tub. Keeping it sheltered from the elements (especially strong winds) can help keep running costs down.

The addition of an air sourced heat pump to your spa is a fantastic cost effective way of keeping the running costs down. They can be retrofitted to most spas and draw around 1.5kw of power but output between 5 and 12kw. As a result, you heat your spa much quicker and using a fraction of the energy. We can supply and fit these to most spas and ensure you are minimising your outgoings in no time.

Q3: I haven't got time to run a hot tub...

We know how busy you are, so why not let us help and take that stress away?

At Aqua Spa and Leisure, we can take care of everything from regular water changes, annual services, maintenance, emergency call outs, chemical deliveries and provide guidance and advice on

safely operating a hot tub at home. Our team of experts are always on the end of the phone should you have a technical question and always happy to help.

SPORT, FITNESS & WELLBEING

For those who enjoy a sporting or fitness-focussed lifestyle, our fantastic range of swim spas give you a home exercise and training experience like no other. Not just for Olympians, triathletes and other professional sports people; swimming, jogging, resistance training, deep tissue hydrotherapy massage and rehabilitation could all be available at your own back door too.

Better still, exercising in water is as effective as exercising in a gym – but while minimising the impact on your joints and without the stress that gravity places on your body. Making movement safer and easier, a home swim spa is your travel-free passport to pain relief and/or injury rehabilitation.

SWIM SPA FOR FAMILIES

While data from Swim England reveals that one in four children cannot swim the statutory 25 metres by the time they leave primary school, teaching children to swim remains one of the most important life skills we can pass on. Furthermore, studies suggest that those who swim early on in life not only have more confidence, in the water and out, but that cognitive function is also boosted. But if you don't have easy access to good local swimming facilities, giving kids those crucial early swimming opportunities can be a challenge.

Swim Spa's offer families the perfect solution – and much, much more...

Splashy fun, a workout pool for exercise and somewhere to retreat to for a gentle restorative swim, a home swim spa is the perfect alternative to a dug-out pool. Enjoyed by cross-generation users, our spas are a hassle-free way of taking a dip – swimming togs on, back door open and in you get!
